**Vancouver, BC, May 29, 2015 – Fjordland Exploration Inc. (TSX-V: [FEX](#)) and Commander Resources Ltd. (TSX-V: CMD)** announce a report dated May 11, 2015 entitled "National Instrument 43-101 Technical Report on the South Voiseyø Bay Project, Labrador" prepared by L. John Peters, P.Ge., Bernard H. Kahlert, P.Eng. and Darryn Hitchcock, P.Ge. has been filed on Sedar for South Voiseyø Bay (øSVBø) nickel-copper-cobalt project, totaling 18,200 ha., located in Newfoundland and Labrador, Canada.

The report reviews the geological setting of the South Voiseyø Bay property as well as the historic exploration activities that have been conducted there. The report concludes that the property merits further exploration. Strong conductors in the Sarah Lake area (the øSandyø conductors) that were identified by the UTEM survey completed by Fjordland in November 2014 warrant drill testing.

On behalf of the Boards of Directors of
